

Client: PA Resources E & A Ltd

Location: Hammersmith, London

Size: 3,000 sq ft

Value: £168,000

Project: Relocation, Office Design and Fit-Out

PA Resources E & A Ltd is an international oil and gas company with operations and assets in nine countries.

The business consists of the acquisition, extraction and sale of oil and gas reserves, as well as exploration to find new reserves.

Rapport Solutions were appointed to project manage their office relocation from Waterfront in Putney to new offices at 80 Hammersmith Road, London.

Under a tight budget restraint, cost controls were applied across each stage of the project development.

Project Deliverables:

- * Project Management
- * Design Services
- * Tender Development
- * Contractor Appointments
- * Furniture Procurement
- * Move Management

Project Outcome:

The final design was based around the natural elements of sun, sea and fire which represented PA Resources' culture.

Fully glazed offices and sliding doors maximise the natural light within the space and seismic lines applied in vinyl film to the glazed units reinforce and underpin their heritage.
